

## Product Information

### Key Features

- 2x125W @ 4Ohm, 1x250 @ 4Ohm Bridge, 1x250W (100 V line).
- No software installation is required. Just connect with any device, open your web browser and start your set-up.
- Internal DSP matrix with 4 mono or 2 stereo inputs.
- 1 or 2 zone output and S/PDIF link.
- Class-D amplifier.
- Built-in Web app control.
- GPIO & Ethernet ports.
- Switching power.
- Dimensions 220 x 44 x 213mm | 2kg

Compact two-channel 4 ohm installation amplifier (up to 125W per channel) or 250W on a 100V line output. Digital signal input and output for easy interconnection without conversions. Dedicated DSP with full connectivity and control via stand-alone Wi-Fi, Ethernet and GPIO. It is possible to control and modify parameters of the unit simply using a web browser

### Applications

Retail & Commerce  
 Education

Hospitality  
 Houses of worship

Industry & Corporate  
 Sports Venues

## Architectural & Engineering Specifications

WORKPRO introduces Synthea Series, the latest addition to our audio product line. This series has been designed to address the demands of the audio integration market, introducing a range of ultra-versatile amplifiers that simplify installations as much as possible.

From corporate installations to entertainment environments, Synthea Series effortlessly adapts to a variety of scenarios. Its discreet design blends seamlessly with its impressive power, allowing you to bring an unparalleled listening experience to every project.

What makes the Synthea Series stand out even more is its ability to operate in both low and high impedance (4Ω and 100V), with powerful Class-D amplifiers rated at 2x125W, 4x125W, 2x500W and 4x500W at 4ff and 250W, 500W, 1000W and 2000W in 100V Line. It offers several channel and power configurations, and has an output section with GPIO and S/PDIF ports that facilitate the interconnection of several units for more complex installations. This provides maximum flexibility. Integrated DSP processing and TCP/IP access allow seamless mixing and routing of any input to any output.

The new Synthea amplifier series includes a web control interface with a WAP access point that intuitively allows users to adjust different parameters via web browser without the need to download specific software or dedicated drivers. This simplifies management and control, making it an ideal solution for a wide range of applications, from bars and restaurants to fitness centers, hotels, educational facilities, corporate spaces, places of worship and conference rooms.

With Synthea, take your sound experience to the next level in any environment.

## Support & Technical Request

All products features are subject to variations due to production tolerances.

We reserve the right to change specifications or improvements in the design or manufacturing that may affect these product specifications without notice, as a part of our policy to continually improve our products.

For technical queries, please contact with your supplier, reseller, distributor or visit our website [www.workpro.es](http://www.workpro.es)
